

Quality Training for Certified Massage Therapists

The FQM has developed competency profiles as part of its integrated training program. Through its flexible training continuum for acquiring professional and technical competencies, for example, certified massage therapists can transition from Profile 1 to Profile 2, or directly to Profile 3. Because the FQM is mindful and respectful of the job market realities faced by massage therapists, the latter can complete these training programs at their own pace.

STUDENT

NETWORK OF ACCREDITED SCHOOLS

PROFILE 1 - MANDATORY BASIC TRAINING (400 hrs)

Human body, learning a basic technique, client-centered approach, professional supervision

Module 1 (90 hrs)
